Former President Biden Diagnosed with Aggressive Prostate Cancer

Statement from the American Cancer Society and American Cancer Society Cancer Action Network

WASHINGTON, **DC** – May 18, 2025 – According to multiple news reports, Former President Joe Biden has been diagnosed with an "aggressive" form of prostate cancer that has spread to his bones.

The following is a statement from the American Cancer Society (ACS) and American Cancer Society Cancer Action Network (ACS CAN):

"We stand with Former President Biden and Former First Lady Dr. Jill Biden as they face this diagnosis. The former president is a longtime champion in the fight to end cancer as we know it, for everyone. Through the Cancer Moonshot initiative, first launched when he was vice president and then reignited when he was president, the president prioritized both government investment in the cancer fight, as well as promoted public-private partnerships to advance progress against the disease.

"In response to the president's call for public-private partnership, the <u>American Cancer Society</u> launched the Improving Mortality from Prostate Cancer Together (<u>IMPACT</u>) initiative to reduce death rates from prostate cancer in all demographics and disparities for Black men by 2035 through advocacy, patient support and research.

"This news is a reminder about the tragic impact of prostate cancer in the US, where about one in eight men will be diagnosed over their lifetime with prostate cancer. Although it is a highly survivable disease when caught in early stages, it is the second leading cause of cancer death in men. Early detection is key, and we are concerned given the 5% year-over-year increase in diagnosis of men with more advanced disease. We can and must do more to prevent late-stage diagnosis and death from prostate cancer. ACS and ACS CAN are increasing our efforts in the progress against prostate cancer and removing barriers to early detection is critical.

"Once diagnosed, it is important for patients to know what resources are available. Our 24/7 cancer helpline (1-800-227-2345) and website, cancer.org, provide education and answers."

According to the American Cancer Society's Cancer Facts & Figures, 2025, an estimated 313,780 new cases of prostate cancer will be diagnosed in the U.S., and 35,770 men will die from the disease this year.

About the American Cancer Society

The American Cancer Society is a leading cancer-fighting organization with a vision to end cancer as we know it, for everyone. For more than 110 years, we have been improving the lives of people with cancer and their families as the only organization combating cancer through advocacy, research, and patient support. We are committed to ensuring everyone has an opportunity to prevent, detect, treat, and survive cancer. To learn more, visit <u>cancer.org</u> or call our 24/7 helpline at 1-800-227-2345. Connect with us on <u>Facebook</u>, X, and <u>Instagram</u>.

About the American Cancer Society Cancer Action Network The American Cancer Society Cancer Action Network (ACS CAN) advocates for evidence-based public policies to reduce the cancer burden for everyone. We engage our volunteers across the country to make their voices heard by policymakers at every level of

government. We believe everyone should have a fair and just opportunity to prevent, detect, treat, and survive cancer. Since 2001, as the American Cancer Society's nonprofit, nonpartisan advocacy affiliate, ACS CAN has successfully advocated for billions of dollars in cancer research funding, expanded access to quality affordable health care, and advanced proven tobacco control measures. We stand with our volunteers, working to make cancer a top priority for policymakers in cities, states and our nation's capital. Join the fight by visiting www.fightcancer.org.
